

Concentration Instructions

This game is played like a match game.

Scramble up and place two pictures of each food on a felt board.

Divide class into two groups.

Have one person from Team A turn over two pictures. If they match, use the information card to say something about that food's nutritional value.

If they don't match, turn them over and let a person from Team B turn over two cards.

If a player makes a match – they get another turn. This continues until they don't make a match.

Continue playing until all have been matched.
