

LOUISIANA RECOMMENDATIONS FOR CONTROL OF TOWN ANTS

These ants are foliage feeders and do not bite. They will strip the foliage off ornamentals, vegetables, and trees. The foliage is then chewed and used to grow a fungus that is the primary food source the ant. Colonies can cover small areas up to the ant of 5 or 6 acres.

MATERIAL	FORMULATION	TIME OF APPLICATION	REMARKS
Logic Bait	Bait	When ants are actively foraging (1.0-1.5 lbs/acre) broadcast	
Amdro Ant Block		0.75 lb/colony
