Practical	28

Going Green

LSU AgCenter, LaHouse Resource Center is committed to wise and sustainable use of resources. As part of that commitment, we choose eco-friendly paper and a printer using vegetable inks. This publication is printed using a paper produced from managed forests and contains 10% post-consumer waste.

Table of Contents

REFERENCE GUIDE	29
Resource-Efficient	29
<i>Energy-Efficiency</i>	29
ENERGY STAR Home	29
Design for the Climate	29
Windows	32
Tight Construction (Air Sealing)	33
Insulation Systems with Good “Whole Wall” R-Values	35
Characteristics of Insulation Materials	37
HVAC - Efficient Cooling and Heating	39
Appliances with Low Life-Cycle Costs	43
Lighting with Fewer Watts, Less Heat	43
<i>Water-Efficiency</i>	43
<i>Waste Management</i>	45
Reduced Construction Waste	45
Household Waste Management	45
<i>Pollution Prevention and Ecosystem Protection</i>	45
Water Quality Protection	45
Minimized Use of Environmental Hazards	46
Native Tree and Ecosystem Protection	46
<i>Favoring Green and Local Resources</i>	47
Suitable Green Materials	47
Site Choice	50
Shift Towards Renewable and Zero Energy	50
Use of Local Resources	51
Durable	52
<i>Decay Resistance</i>	52
Moisture Control	52
Long-Lasting Materials and Equipment	56
<i>Multihazard Resistance</i>	57
Flood Damage Reduction	57
Hurricane and Tornado Resistance	60
Fire Protection	66
Hail and Freeze Hazards	67
<i>Termite Resistance</i>	67
Healthy	69
<i>Good Indoor Air Quality</i>	69
Control of Mold, Dust Mites, Other Biological Pollutants	69
Control of Combustion Pollutants	72
Control of Other Indoor Pollutants	73
<i>Universal Design</i>	74
Visitability	74
Universal Features	74
Convenient	75
<i>Family-Friendly and Functional Floor Plan</i>	75
<i>Low Maintenance</i>	76
<i>Advanced Wiring</i>	77
<i>Adaptable</i>	77
Practical	78
 Balancing the Criteria	79
HIGH-PERFORMANCE HOME INFORMATION RESOURCES	80

list of figures

US Department of Energy Climate Zone Map	8	Step Flashing	52
Louisiana Wind Speed Zones	8	Window Flashing Systems Integrated with Housewrap	52
Gulf Region Wind Speed Zones	8	Drainage Plane and Space Behind Cladding	52
Fromosan Subterranean Termite Nest in Wall	9	Vented Drainage Plane for High Rainfall Areas	52
Conduction	10	Two Layer Wrap for Stucco	54
Convection	10	Classic Hot-Humid Climate Wall	54
Radiant Heat	10	Classic Mixed-Humid Climate Wall Assembly	54
Negative Pressure	11	Plastic Lining Slab Grade Beam	55
Relative Humidity and Health Effects	11	Vented Crawl Space	56
OVE Advanced Framing	15	Elevated Slab in Filled Stem Wall Foundation	58
Structural Insulated Panel System Autoclaved Aerated Concrete (AAC)	16	Pier and Beam Foundation	58
Insulating Concrete Forms (ICF)	16	Elevated Mechanical System	59
ISPS	17	Flap Valve	59
Energy-Saving Landscape Plan	29	Ball Valve	59
Seasonal Sun Paths	29	Sewer Backflow Prevention Gate Valve	59
Solar Heat Gain	30	Drainable Dryable Wall Assembly	60
Orientation of House for Solar Control	30	Load Forces on House	61
Tubular Skylight	30	Severe Weather Safe Room	62
Overhang for South-facing Windows	31	Assorted Wall to Foundation Connections	62
Passive Solar Design with Thermal Mass	31	Story to Story Connection with Straps and Sheathing	62
Cross Ventilation Aided by Wing Wall	31	Narrow Wall Brace	63
ENERGY STAR Window Label	32	Corner Hold-Down	63
NFRC Label on Tested Window Units	32	Roof Rafter/Truss Connectors	63
Spectrally Selective Low-e Glass	33	Hip and Gable Roofs	63
Sealed Housewrap Details	33	Balloon Framing of Gable End Wall	64
Airtight Drywall Approach	34	Ring Shank Nail	64
Sealed Bypasses & Penetrations	34	Taped Roof Deck Seams for Additional Protection	64
Airtight Electrical Box	34	Damaging Wind Pressure Through Broken Window	65
Radiant Heat Barrier under Roof	35	Impact Rated Storm Shutters	66
Cellulose in Wall	36	Steel Mesh Termite Barriers	67
Raised Top Plate	38	Dehumidifying Ventilation System	69
Three-Stud Corner with Drywall Clips	38	Fresh Air Supply Integrated with Central HVAC System	70
T-wall Options that Allow Insulation	38	Whole House Dehumidifier Schematic and Portable Dehumidifier Under Duct	70
Geothermal Heat Pump Ground Loop	39	Duct Leaks and Negative Pressure	71
Seal Ducts with Mastic	41	Leaky Return Air Plenum Draws Dirty Air to Coils	71
Ducts within Conditioned Spaces	41	Air Pressure Imbalance	72
Efficient Duct Layout	41	Return Air Transfer Grille	72
EnergyGuide Label	42	CRI – IAQ Label	73
Compact Fluorescent Lamps	43	Radon Vent System	73
Modular Design in 2 ft. Dimensions	45	Universal Design Bathroom	74
Finger Joint Studs	47	Kitchen Design and Space Guideline	75
LSL Studs	46	Multicable Wiring	77
Photovoltaic System	50
