**For additional resources, updates, and real-time data see our website: <http://ecowatch.ncddc.noaa.gov/c-side>**

The site provides direct linkage to local, state, and federal information as it pertains to severe weather preparation and monitoring across the Gulf of Mexico coastal region.

**NOAA Satellites and Information Service (National Environmental Satellite, Data and Information Service) - NESDIS** operates the satellites and manages the processing and distribution of millions of bits of data and images these satellites produce daily. The prime customer for the satellite data is the NOAA National Weather Service, which uses satellite data to create forecasts for television, radio, and weather advisory services.

## Louisiana 511 Traveler Information

Louisiana 511 Traveler Information is a free service of the Louisiana Department of Transportation and Development. Travelers can dial **511** or visit [www.511la.org](http://www.511la.org) for around-the-clock, real-time traffic updates as well as information about construction activities and weather-related road conditions simply by saying the route or region about which they are seeking information. The regions are: North West, North East, Central, South West, North Shore, South Central, and South East. In case of evacuation, information will be available through 511 on such important topics as contraflow status.

Residents without access to 511, or anyone calling from outside of the state of Louisiana, can access the 511 Traveler Information Service by calling **888-ROAD-511 (888-762-3511)**.

**For more information, visit the Louisiana 511 Traveler Information website at [www.511la.org](http://www.511la.org).**
